For the execution phase of the Union’s strategic plan, a tiered set of goals have been established by and for the Union on three distinct levels:

1. **Key Goals** issued to Union areas by the Director of the Union that must be met within five years; seen as critical to the Union’s future success and sustainability.

2. **Priority Goals** for Union areas determined by the Director of the Union and area Director and deemed to be substantial enough goals and challenges that they will require ongoing planning and execution.

3. **Additional Union Area Goals** determined directly by area directors and their respective leadership team(s).

Any goal set by a Union area must align with the Union’s stated mission, vision, and values. Area goals and the pathways to those goals are expected to be developed and reviewed on an annual basis by area directors under the supervision of the Director of the Union, using appropriate data and assessment tools/techniques as required.
